Enterprise Business Intelligence
& Data Analytics Assessment

Transform Your Imaging Operations

Imaging plays a critical role across the patient care continuum. How you prioritise, interpret, and exchange data between departments can positively impact your patient flow — and improve the care you provide. But how do you determine what information should be shared?

Our Medical Imaging Consulting team will help you transform your imaging operations. We conduct an operational, clinical, and technical evaluation of your organisation's people, processes, and technology to help you unlock your data, improve your business outcomes and clinical processes, and successfully manage risk.

Uncover Efficiencies with Comprehensive Imaging Assessments

Vendor-agnostic imaging analytics helps you harness your data to improve performance, control costs, and enhance patient care processes

Create a Plan

Change Healthcare Medical Imaging Consulting provides customised service solutions to help ensure your business is running smoothly.

First, our consultants conduct an operational, clinical, and technical evaluation of your resources, current processes and technology. We help you uncover ways to:

- Improve performance through workflow enhancements and better system utilisation
- Enhance efficiency through better resource utilisation, staff productivity, and coordinated patient care
- Identify opportunities for improvement

Then, our team of experienced diagnostic imaging consultants provide a prioritised list of next steps, recommending solutions to help you address both your short- and long-term goals. We work closely with you to make sure your unique needs are supported and understood.

Turn Data into Action

We help you unlock the real value of your data—and benefit from its insights. By defining your strategic key performance indicators (KPIs) and linking them with common industry-accepted imaging metrics, you can access the data that matters most to your business.

Our vendor-agnostic Imaging Analytics services help you share data across your enterprise to gain a clearer view of your organisation, making information more accessible to your clinicians. This actionable intelligence helps your team drive continuous improvement, control costs, and make more informed decisions.

The consultants guide you through the implementation of solutions and processes that can help to address your most pressing concerns, such as productivity issues, regulatory changes, or the move to value-based reimbursement.

Enhance Patient Care

Our Medical Imaging consultants will help you take the first step on the path to optimal clinical, operational, and business performance. Our Medical Imaging solutions and services are:

- **Vendor-agnostic:** Our imaging analytics capabilities are not tied to a specific application or system. They bring multiple data sources together in a single location.
- **Holistic:** A single, enterprise view of your department displays information to everyone. The data shown is always meaningful, as it is aligned with your strategic KPIs and benchmarks.
- **Accurate:** Data quality is at the core of our implementation process. We verify that the correct data is measured, cross-check data sources, and standardise metrics and definitions across your department.

Together, we will establish a cohesive workflow that improves the efficiency and value of the patient care you provide.

About Change Healthcare

Change Healthcare is inspiring a better healthcare system. Working alongside our customers and partners, we leverage our software and analytics, network solutions and technology-enabled services to help them improve efficiency, reduce costs, increase cash flow, and more effectively manage complex workflows. Together, we are accelerating the journey toward improved lives and healthier communities.
